

SUMMARY

I am a highly motivated Full-Stack Software Engineer with over three years of experience working in SaaS companies, namely Base.vn and True Platform. My expertise lies in designing product models, developing full-stack applications, and having a strong product mindset. I am eager to tackle new challenges and contribute my expertise to exciting projects in the future.

EDUCATION

Hanoi University of Science and Technology

Engineer's Degree in Computer Science
Excellent
2018 – 2023

LANGUAGES & TECHNOLOGIES

- Programming languages: PHP, JavaScript, Java, HTML, CSS.
- Databases: MySQL, Redis.
- Frontend frameworks & Tools: jQuery, React JS, Figma, UI/UX best practices.
- Backend technologies: Java Spring, NodeJS, RESTful APIs, WebSockets.

HONORS & AWARDS

- Rookie star of the year 2023 | Base.vn
- A study accepted in the journal Knowledge-Based Systems 2023 | HUST
- EVN Scholarship 2023 | HUST
- PVN Scholarship 2021 | HUST

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer

Base.vn | 03.2022 – 04.2024
True Platform | 04.2024 – 06.2025

Both Base.vn and True Platform are the B2B SaaS (Software-as-a-Service) Company in Vietnam and global that specializes in providing comprehensive business management software solutions.

- Designed scalable and maintainable product models, focusing on entity relationships, data structure, and business logic alignment.
- Built and optimized features using in-house frameworks.
- Enhanced UI/UX with Figma and collaborated closely with design teams.
- Worked on key SaaS products for business operations and collaboration.
- Developed and maintained full-stack applications using PHP, MySQL, JavaScript, jQuery, HTML, CSS, RESTful APIs
- Ensured code quality, performance, and security for production-level systems.

Teaching Assistant

Hanoi University of Science and Technology | 09.2021 – 08.2022

Worked as a Teaching Assistant in 4 classes of 2 modules at SOICT

- Applied Algorithms
- Introduction to ICT

Responsible for the following tasks:

- Assisted instructors in course planning and organization.
- Provided tutoring and support to students
- Assisted with lecture preparation and delivery

NOTABLE PROJECTS

True platform

- **Townhall:** An internal communication application designed for enterprises to broadcast company-wide announcements, share updates, and reinforce corporate culture. Facilitates transparent communication between leadership and employees, ensuring alignment across the organization.
- **Honors:** A recognition and appreciation product designed to celebrate employees's contributions and achievements. Encourages peer-to-peer recognition without managerial intervention, fostering a positive workplace culture, increasing employee engagement, and reinforcing company values.
- **Helpcenter:** A comprehensive help desk and knowledge base system that organizes company documentation into structured articles. Features full-text search, categorization, and an intuitive editor for easy content management. Enables employees and customers to quickly find answers, reducing support workload and improving knowledge sharing within the organization.
- **Webform:** A CRM-integrated web application for creating customizable forms to collect customer data, automate lead/deal creation, and streamline business processes. Utilizes AI to generate webforms dynamically based on user input, optimizing data collection efficiency. Supports embedding, direct sharing, and data analysis for marketing insights.
- **Sales (CRM app):** Maintained and developed features for customizing dashboards and generating reports using AI, enabling sales teams to visualize key metrics, track performance, and make data-driven decisions efficiently.

Base.vn

- **Base XSpace:** A strategic enterprise web application launched at SAAS Day 2023, enhancing management, operations, and work efficiency across all company levels with customizable dashboards and communication tools.
- **Base Docs:** A document management web application that allows enterprises to organize and collaborate on documents in a structured tree format. Features a block-based editor similar to Notion, enabling flexible content creation, version control, and seamless team collaboration.
- **Other apps I have worked on:** Applications in the Work+ suite (work management): Upgrade and build features of applications with a large number of end-users such as: Base Wework, Base Workflow, Base Request, Base Review, Base Goal, ...

ADDITIONAL SKILLS

- Demonstrates a quick learning ability and adapts swiftly to new technologies.
- Possesses strong analytical and problem-solving skills.
- Highly responsible, reliable, and committed to meeting deadlines.
- Capable of working effectively both collaboratively within teams and independently.
- Proficient with AI coding assistants to accelerate development, improve code quality, and boost productivity.
